

FOR IMMEDIATE RELEASE

PrintWest, Inc. is pleased to announce they have acquired Scanner Graphics of Seattle. Established in 1978, Scanner Graphics has been a part of prepress in Seattle for over 32 years. What began with scanning and retouching has expanded over the years with the addition of digital photography, large format printing and associated services such as window, wall and graphics and retail and tradeshow displays. In addition to bringing large format printing knowledge and services to PrintWest and its customers, the real value of this acquisition is the years of prepress and color management expertise that the employees of Scanner Graphics bring. The Scanner Graphics prepress and color management client list includes many high profile companies in the Seattle area.

This is the second acquisition this year for PrintWest which also acquired SeaPrint in Kent in June. PrintWest is an FSC Certified Green Printer and is the most quality awarded locally owned printing company in the five state region covered by the Pacific Printing Industries Association (PPI).

Scanner Graphics will continue to operate with the same staff and in its current location on Fairview Avenue in the booming South Lake Union area of Seattle. PrintWest also operates with a production facility and sales office in Woodinville and the SeaPrint sales office in Kent giving it a strong regional presence.
